

NEW STANFORD HOSPITAL

Stanford Health Care is building a revolutionary new hospital facility to accommodate advances in medical technology, increase capacity needs, meet new seismic safety requirements and transform the way that patient care is delivered.

The 824,000-square-foot hospital facility was designed by internationally-recognized firm Rafel Vinoly in association with PerkinsEastman.

Construction of the hospital is currently underway and officially broke ground on May 1, 2013. The facility will be connected to the existing hospital by bridge and tunnel. Stanford Health Care will remain fully operational during construction.

Project Highlights

- Privacy, comfort and patient safety through individual patient rooms
- 368 beds in the new hospital building for a total of 600 patient beds on-site
- A new Level-1 Trauma Center and Emergency Department, more than twice the size of the current ED, with 76 bays
- State-of-the-art diagnostic and treatment rooms including 20 operating rooms, eight interventional/radiology image-guided rooms, three MRIs, three CTs and one interventional MRI
- Five gardens for patients and visitors, walking trails and a meditation room
- A flexible pavilion design with oversized windows to provide natural light and views of the surrounding foothills
- New parking structure with 900 spaces

NEW STANFORD HOSPITAL

The New Stanford Hospital

The new Stanford Hospital will create a healing environment tailored to each patient's unique needs. The finest facilities and medical care anywhere will be available with the flexibility to adapt to new technologies and life-saving innovations not yet discovered.

About the Renewal Project

The new Stanford Hospital is part of the Stanford University Medical Center Renewal Project, which includes the expansion of Lucile Packard Children's Hospital Stanford, the renovation of Hoover Pavilion, the Welch Road Utility Project and the replacement of School of Medicine facilities. The Medical Center must rebuild and

modernize its facilities in order to continue serving the region's current and future healthcare needs and accommodate advances in technology and patient care.

Construction Timeline

2011

- Project approved by Palo Alto City Council

2012

- Site preparation and demolition

2013

- Groundbreaking ceremony
- Shoring and mass excavation

2014

- Foundation work/installation of base isolators
- Foundation complete
- Steel installation

2015

- Topping Off
- Construction of exterior and interior begins

2016

- Construction of exterior and interior continues
- New parking garage construction complete

2017

- Landscaping work continues
- Equipment installation begins
- Construction of exterior and interior continues

2018

- Construction of exterior and interior continues
- Equipment installation continues

2019

- Staffing, stocking and testing of new hospital building begins
- Hospital open to patients
