

New Stanford Hospital **FAST FACTS**

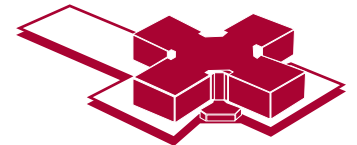

Over a decade of visionary planning and design will soon culminate in completion of the new Stanford Hospital when it opens in 2019. Located on the campus of Stanford University, where life-changing interdisciplinary discoveries and breakthroughs from Stanford Medicine are continuously translated into patient care, this stunning facility will set a new global standard.

Our New Space

824,000 sq. ft.
of building space

New Level-1 Trauma center and Emergency Department,
more than double the size of current ED

368 new private rooms for a total of 600 on the hospital campus.
All patient rooms are private and are spacious enough to accommodate family overnight during a loved one's recovery

Advanced Technology

3 acres
of surgical floor space

3 MRIs **20** operating rooms
3 CTs **8** interventional/radiology image-guided rooms

Interventional MRI (iMRI) suite allows patients to be scanned in an imaging room adjacent to the operating room, enabling safer surgeries

Healing Power of Nature and Art

5 gardens
with walking trails

A meditation room and an interfaith chapel
will support the community's diverse spiritual care needs

The Galleria Walkway

is filled with natural light and art that is colorful, lively, warm and contemplative

Sustainable Design

The new Stanford Hospital is designed to be a model of environmental sustainability and resource conservation. From early construction phases through day-to-day resource management, responsible environmental practices for the new Stanford Hospital have been considered every step of the way.

Pursuing a **LEED Silver Equivalency**

A **water reclamation system** captures condensate on the A/C units and uses that water for irrigation of the hospital's "green roof"

Designed to have a **90 to 95 Energy Star** rating

Use of drought-tolerant, native-California plants results in **30% reduced** water consumption for irrigation

35% less energy

used than the average hospital

25% more energy efficient than a hospital designed to meet current standards

Patient Experience

Planned entirely around the unique needs of patients, the hospital will deliver **a new model of care** focused on convenient access, comfort and coordinated care

Clear vision glass windows house an **intelligent shading system** with a temperature controlling layer, controlled by patients

MyHealth mobile app

provides patients individual directions that focus on their care during inpatient stay

Community Support

\$643M raised to deliver a vision of what health care can and should be

Design and Construction

Designed by internationally-renowned **Rafael Viñoly Architects** in association with **Perkins Eastman** and constructed by **Clark McCarthy**
